## Projects

**Tesla-Clone** | Newton School ([link](#))

October 2022 - October 2022

Features:

- Front end of the website with functional burger menu.
- Used Styled Component library and Material UI to style certain components.

Tech Stacks: **React, CSS.**

My Contribution:

- The website contains a navigation bar and a burger menu which is functional and there are multiple catalog items shown with the help of fewer components.

**TvMaze** | Newton School ([link](#))

September 2022 - September 2022

Features:

- Searching data of shows and actors with the help of API call.
- It has responsive UI.

Tech Stacks: **React, CSS.**

My contribution:

- The website consist of two options and a input field to search for the desired result of the shows. To make it cost efficient, calling API on click of enter key.

**Todo-List** | Newton School ([link](#))

July 2022 - July 2022

Features:

- Deleting, editing, marking as complete and sorting according to completed or not completed tasks.
- It has responsive UI.

Tech Stacks: **React, CSS.**

My contribution:

- This todo-list is made with the help of react function components and have added a feature of sorting the list of items and a scroll bar preventing page from increasing height to keep it user friendly.

Features:

- Multiple pages consist of Home page, About Page and Contact Page.
- It has responsive UI.

Tech stacks: **HTML, CSS.**

My contribution:

- The website consist of multiple pages which are made with the help of different HTML files and navigation is done across these pages with the help of navigation bar.

---
